

TRANSCRIPT PREPARED BY THE CLERK OF THE LEGISLATURE  
Transcriber's Office  
FLOOR DEBATE

April 18, 2002 LB 642

the Legislature on record endorsing Israel and supporting their position, and I want it clear for the record what that position is, and what it is you are supporting and endorsing. Four of my colleagues did speak. Others just went along in silence as happened during the holocaust when they said people watched terrible things happen to Jews at the hands of the Nazis and didn't say anything. But people now are condemning those who watched in silence. Well, we have four who were willing to speak in behalf of Israel yesterday: Senator Brashear, Senator Brown, Senator Suttle, and Senator Bourne. But the ones who were condemned in Nazi Germany were not those who supported the Nazis, but those who would not speak against what they were doing. But we have those supporting those who are committing worse depredations than the Nazis committed. And there is greater blameworthiness on the state of Israel because it professes to be a democracy. You all's friend, you all's democracy. So for them to out-Nazi the Nazis, makes what they do doubly reprehensible. You all may not realize it, but they went down to Argentina and kidnapped Adolf Eichmann, known as the engineer of death, the one who supposedly who did more to carry out what was called the Final Solution, gassing and burning Jews. And they took him to Israel, and put him through a show trial, hanged him, cremated him, spread his ashes over the Mediterranean Sea because they said what he did was such a terrible thing. Then they coined the mantra, never again, and here they are doing it to the Palestinians. The rubble that exists in the occupied territories did not exist in Nazi Germany where the Jews lived because they took that territory...

SPEAKER KRISTENSEN: One minute.

SENATOR CHAMBERS: ...it was called the Aryanization of Jewish property. The Nazis took it and used it for their purposes, and the equivalent is where the Jews, because they have more kill power, occupied territory in the West Bank and built what they call settlements, taking the land from the Palestinians a second time, and using their kill power to protect them, but Americans can agree and go along with that because of what they did against the Native Americans so they say, ho-hum, what's new? We understand that. You got to clear out these people who are inferior, and that's exactly what people like Teddy Roosevelt
